

CRITERION™

A Complete Measurement Solution

series 900

series 700

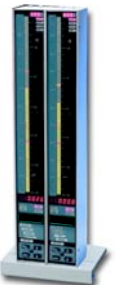

series 500

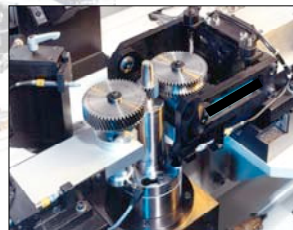

series 300

series 100

In-Process Automated Measuring

Semi Automated Measuring

Bench Measurement

Fixture Measurement

Quality Information System

CRITERION is a revolutionary quality information system capable of taking shop floor process measurement, analysis and control of discrete parts manufacturing to a higher level.

Advanced and full-featured, CRITERION offers a network solution that efficiently integrates all aspects of quality and production:

- Part verification
- Data collection
- Process monitoring
- Control plans
- Statistical analysis
- Reporting

- series 900 Automatic Measuring
- series 700 Semi-Automatic / Bench Top Gauge
- series 500 Bench Top Gauge
- series 300 Data Collection
- series 100 Column Measurement

Full product line for all measurement needs

From series 100 column indicators to series 900 automatic measuring systems, CRITERION provides the measurement solution for hand-held fixture measurement; semi-automatic or in process automated measuring systems

CRITERION

A plant-wide solution for process measurement and control of part manufacturing

Open Architecture

Designed with an open architecture, CRITERION operates with existing automation and information systems, whilst integrating with the Internet, PC and Microsoft® technologies.

The standard cost-effective CRITERION series provides integrated solutions that extend from simple manual stations to complex fully automatic machine to supervisory office stations.

Partners Providing Turnkey

Understanding in-line and final inspection processes, no other supplier is more capable of helping you meet your total quality and productivity standards than Intra.

For more than 55 years, we have dedicated our global resources; industry standards and technical know-how to helping manufacturing industries optimise part quality and production efficiencies. It is this world-class industry expertise that has enabled us to develop the most advanced, open and scalable quality information system available.

All Your Quality Measurement

- Linear to complex geometric form measurement
- Manual, semi-automatic and fully automatic systems
- Precision single-point measurement to supervisory control
- Single plants to multiple locations
- Expert site evaluation to project management
- System design and configuration to concurrent engineering with machine tool partners
- On-line diagnostics to worldwide field service and operator training.
